M-Pro 7 Launches Ammonia-Free Copper Remover

Phoenix, AZ (March 1, 2006) – Pantheon Chemical announces the highly anticipated January 2006 launch of the M-Pro 7 Copper Remover, the first ammonia-free copper remover on the market to offer superior performance.

M-Pro 7 Copper Remover's ground-breaking technology was developed to remove copper fouling up to four times faster without the use of ammonia or other toxic chemicals commonly found in existing copper removers. Ammonia is a toxic substance known to cause headaches, dizziness, nausea, respiratory and skin irritation with prolonged exposure. While an effective copper remover, ammonia can be damaging to firearms, leaving behind crystals that attract water and can cause corrosion and microscopic stress fractures in firearms.

Cleaning firearms to the pore, M-Pro 7 Copper Remover's innovative formulation dissolves all copper fouling to improve the firearms' accuracy and reliability, at the same time leaving behind conditioners to repel future fouling. M-Pro 7 Copper Remover is odor-free, non-toxic and safe to use on bore steel. As with all M-Pro 7 products, M-Pro 7 Copper Remover's non-hazardous, non-flammable chemistry is transportable for overnight shipping and/or airline travel.

M-Pro 7 Copper Remover is available nation-wide at your local sporting goods retailer.

M-Pro 7 Weapons Maintenance products were designed for the military, law enforcement and high use weapons. M-Pro 7 technology reduces weapon maintenance time up to 80%, exceeds MILSPEC cleaning system requirements and is commercially transportable world-wide. In line with Pantheon Chemical's standards for safe technology, all M-Pro 7 products are odorless, non-toxic, non-hazardous, biodegradable, non-flammable and environmentally friendly.

M-Pro 7® is a registered trademark of Pantheon Chemical, Inc., Phoenix, AZ. Pantheon Chemical is a privately held industrial chemical manufacturing company that replaces toxic chemicals and processes with high performance non-hazardous technology. Pantheon Chemical sets the standard for corporate responsibility through proactive ideas and products that accelerate global sustainability while producing profits.
