

FN FNX 9 AND FN FNX 40 PISTOLS

The new FN FNX 9 and FN FNX 40 pistols offer the key features demanded by today's serious handgunner. New ergonomic polymer frames have a low-bore axis for flat shooting and less felt recoil, resulting in improved control. Deep-checked grip panels are comfortable and designed for no-slip shooting. Four interchangeable backstrap inserts quickly offer a custom fit and feel. The profiled stainless steel slide has cocking serrations front and rear. A four-inch hammer-forged stainless barrel delivers long life and pinpoint accuracy. Fully ambidextrous operating controls make the FNX perfect for competition and personal defense for both right- and left-handed shooters. Each FNX comes with both a decocker and manual safety, making it one of the safest hammer guns on the market. Every part is proudly made in the USA. For more information, contact FNH USA, Dept. S.W.A.T., P.O. Box 697, McLean, VA 22101, (703) 288-1292, www.fnhusa.com.

GEAR LOCKER

M-PRO7 GUN OIL LPX

M-Pro7 unveils next-generation technology in the new M-Pro7 Gun Oil LPX. More than just a gun oil, this product replaces all gun oils, cleaner-lubricant-protectants (commonly known as "CLPs") and dry lubes. M-Pro7 Gun Oil LPX provides the benefits of current lubricants while mitigating typical drawbacks such as

evaporation, separation, gumming and toxic odor. Most gun lubricants on the shelf today are formulated from decade-old technology. M-Pro7 conducted extensive cross-industry research of recent lubrication advancements that led to a breakthrough: an innovation in blending synthetic oils, liquid molybdenum and polymers. M-Pro7 Gun Oil LPX also contains a non-solvent based cleaning agent. This new technology repels dust/dirt and can be used as a cleaner

to remove surface carbon in the field. M-Pro7 Gun Oil LPX is the only commercial product to pass the initial testing for the recently updated military weapons specification including the 900-hour humidity cabinet corrosion and 100-hour salt spray corrosion testing. For more information, contact M-Pro7 Weapon Care Products, Dept. S.W.A.T., 21410 N. 19th Ave., Suite 200, Phoenix, AZ 85027, (888) 608-7888, www.MPro7.com.

BURRIS ELIMINATOR LASERSCOPE

Burris unveiled its new Eliminator LaserScope at the 2010 SHOT Show in Las Vegas. Burris takes the lead in laser

GG&G SPRING-ACTUATED FLIP-UP FRONT SIGHT

The GG&G Spring-Actuated Flip-Up Front Sight has been redesigned to be lighter in weight and quicker in deployment. Although specifically designed to provide the correct sight height when mounted on a tactical forearm, the sight can also be installed on gas blocks that are the same height as the upper receiver. The new sight also has a 15% reduction in price. With just a push of a button, the flip-up front sight can be quickly
